1881 W. ROBERTS in *Proc. The action of an enzyme may be designated *enzymosis*, and the nature of the action may be spoken of as *enzymic*. 1890 A. S. LEA in *J. Nat. Physiol.* XI. 254 The word 'zymolysis' might be conveniently used to denote... the changes produced by the enzymes or unorganized ferments. 1898 J. R. GREEN in *Ann. Extinction. Add: 5. *Petrography*. (See *quots.*) So **Extinguished a.**

1882 GEIKIE *Text-bk. Geol.* 183 In searching for the crystallographic system to which a mineral in a microscopic slide should be referred, attention is given to the directions in which the mineral appears dark, in other words, to the directions of its extinction, between crossed Nicols. It is extinguished when two of its axes of elasticity for vibrations of light coincide with the principal sections of the two prisms. 1912 tr. *Weissenh's Petrogr. Meth.* 67 Maximum brightness is obtained when the vibration directions of the crystal are at 45° to those of the nicols. It diminishes upon further rotation and passes gradually over into complete darkness when these directions are respectively parallel. This latter position is also called the position of extinction, and the vibration directions in the crystal, the extinction directions. *Ibid.* 71 Extinction is of especial importance in the investigation of cleavage pieces. *Ibid.* 70 Extinction Curve for Diopside. *Ibid.* In triclinic minerals the determination of the extinction angles is of value only when the orientation of the face upon which they are observed is accurately known. 1921 A. HOLMES *Petrogr. Meth.* 126 When a transparent mineral fragment is rotated between crossed nicols various phenomena may be observed according to the nature of the mineral and the orientation of the fragment. If the object remains dark, and is therefore isotropic, the total extinction indicates an amorphous or cubic (isometric) mineral in an unstrained condition, or a basal section of a uniaxial mineral (tetragonal, hexagonal, or trigonal). *Ibid.* Except by rare coincidence in all sections of triclinic crystals, the extinction is neither constant nor symmetrical, but is generally 'inclined to the... such direction and the nearest extinction is the extinction-angle.

1897 RANJITSINGHI *Jubilee Bk. Cricket* ii. 50 There is no need to treat extra-cover separately. The position is a cross between cover and mid-off, and its duties are a mixture of the duties required in those two places. 1897 *Encycl. 1864 HAASST *Rep. Form. Canterbury Plains* 19 The term 'delta' in geology is confined to the alluvial deposits of a river at its mouth, falling either into the sea or into a lake; but thinking that giving such a name to the alluvial accumulations of the rivers in this island, showing some peculiarities, would impart an erroneous impression, Dr. Hector and myself, in drawing up a synopsis of the geological formations of New Zealand, have adopted for the formation of those subaerial accumulations the expression 'Fan', for those of regular water-courses; and of 'Half-cone', for those of intermittent mountain torrents, and we shall for the future use these two expressions. 1873 F. DREW in *J. Geol. Soc.* XXIX. 446 At the mouth of each of these [gorges] are alluvial fans, which project out into the flat of the river-alluvium. *Ibid.* 447 The fan is properly a flat cone, having its apex at the mouth of the ravine. *Ibid.* 448 The only difference of form between an alluvial fan... and the fan talus sketched in fig. 2 is in the degree of slope. *Ibid.* 455 The course of events was, that after the formation of that fan the main events lowered its bed, cutting through its own alluvium; this caused the fan-stream to cut through its fan. 1883 H. MILLER in *Proc. R. Phys. Soc.* VII. 290 Fan Terraces, or Lateral Delta Terraces. 1890 GILBERT in *U.S. Geol. Survey Monograph* I. 81 footnote. The 'alluvial fan' of Drew is the 'alluvial cone' of American Geologists, and Drew is there would be some reason for preferring 'fan' to 'cone' if it were necessary to employ a single term only. It is if it were necessary to use them as synonyms, employing 'cone' convenient to use them as synonyms, employing 'cone' when the angle of slope is high and 'fan' when it is low. 1902 in *Ld. Avebury Scenery of Eng.* 482 The vale of Neath

Fatigue, sb. Add:

1. c. **Physics.** *Fatigue of elasticity, elastic fatigue*, etc.: see **quots.**

1892 G. F. Barker *Physics* 143 A curious phenomenon called the 'fatigue of elasticity' has been observed in solids which shows very clearly the effect of molecular friction. When a wire is vibrated torsionally, there is always a displacement of the zero-point to one side or the other, according to the direction of the original torsion; this disturbance requiring hours or even days for its disappearance. If the wire be kept vibrating, however, the molecular friction is greatly increased. 1899 *Nature* 6 July 239/2 Experiments on an iron wire...showed distinct fatigue of elasticity. 1922 *Glazebrook's Dict. Applied Physics* II. 505/1 Photoelectric Fatigue.—The photoelectric activity of a metal surface which has been freshly polished diminishes as the time that has elapsed since the metal was polished is increased. This is known as the 'fatigue' of the Hallwachs effect.

d. **Physiol.** A condition of cells or organs caused by excessive activity and characterized by loss of power due to the formation of waste products.

1900 W. P. Lombard in W. H. Howell's *Text-bk. Physiol.* (ed. 2) II. 70 The fatigue which results from functional activity has, therefore, a twofold cause, the decrease in energy-holding compounds available for work and the accumulation of poisonous waste matters.

d. **Physics.** (See **FATIGUE** sb. 1 c.)

1892 G. F. Barker *Physics* 144 If an electrically vibrated tuning-fork be kept in motion for a long time, its elasticity

appears to become fatigued. 1899 *Nature* 6 July 239/2 There is no apparent reason why too large an initial oscillation should be given always to the fatigued wire and to the unfatigued wire.

Fecund, Fecundity. Distinguished from **fertile, fertility** (see quot.).

1866 J. M. DUNCAN *Fecundity*, etc. 3 By fertility or productiveness I mean the amount of births as distinguished from the capability to bear... By fecundity I mean the demonstrated capability to bear children; it implies the conditions necessary for conception in the women of whom its variations are predicated... In short, fertility implies fecundity, and also introduces the idea of number of progeny; while fecundity simply indicates the quality without any superadded notion of quantity. 1904 *Brit. Med. Jnl.* 23 Apr. 769 A difference is drawn between fecundity and fertility. Thus women of Irish birth in Australia are less fecund than women born either in New South Wales or in Scotland, but they are more fertile. In other words fewer Irish women have children, but to those who are fecund more children are born.

HUTCHINSON *Wireless* 51 The current is first passed through the electrolyte in the direction A to K, with the result that A is peroxidized; it is then reversed, in which step the oxygen at K forms PbO₂ there, while the hydrogen at A reduces the existing PbO₂ to porous spongy lead. This operation is several times repeated, with the final result that the last anode (positive plate) has a thick coating of dark brown lead peroxide, while the last cathode (negative plate) is coated mainly with metallic lead of a greyish colour in a porous spongy condition, readily acted on by the SO₄ during discharge. The process is known as 'forming' the plates.

Graft (graft), *sb.5* orig. U.S. slang. [Origin uncertain. Perhaps a use of GRAFT *sb.4* work' (cf. job); but some authorities connect it with GRAFT *sb.1* with the notion of 'excrescence'.]

 1925 C. H. BROWNING *Bacteriology* ii. 32 Certain bacteria
 part with the violet stain and are consequently counter-
 stained red with the fuchsin; these are Gram-negative

 this colour is much more intense than that of the red
 counterstain, they do not appear stained by the latter;
 hence such Gram-positive organisms show a blue-black
 colour.
